

ImPaCCT Foundation

Department of Paediatric Oncology
Tata Memorial Hospital.

May 18, 2016

Dear Jinesh Mehta & Sejal Shah,

On behalf of the Division of Paediatric Oncology, We would like to thank the team "ANJEZE" for the association over the past few years and the ongoing service you have rendered to the little children suffering with cancer. This is to inform you, that with your association with us, we have managed to run several programs for our kids at hospital.

Below mentioned please find the impact of your work. We are sure this will further motivate you to work with us for years to come.

On Going Programs at Tata Memorial Hospital by Team "ANJEZE"

Bless My Day -

- a) Gift Distribution - Through this program for last two years every Monday morning, you have distributed more than 2000 gifts to the children admitted in the ward and it continues.
- b) Hygiene Kits - You & your team have managed to explain our patients the importance of Hygiene Kits and distributed 1000 kits so far and the program continues.
- c) Medicine Box - Your team has given out 2730 medicine boxes explaining the patients importance of using a medicine box.

Emergency Funds/ Medicines -

- a) By collecting funds (donation) towards emergency funds you have managed to fund the treatment of approx 732 children, in giving timely help for initiating treatment.
- b) Providing us with emergency medicines for the ward patients has been helping us give timely treatment to the non affording families who are admitted with us.

Ration Distribution -

- a) Through this program you have managed to give food grains to the families of children taking treatment at Tata Memorial Hospital. Through SRLC you have distributed 15,000 Kgs of food grains till date, helping 1500 families. This program helps in combatting the problem of malnutrition in paediatric patients and helps provide them with wholesome nourishing meals while on treatment.

Holistic Child Adoption -

- a) You and your team have adopted 15 children for complete holistic care. These are the cases no NGO or Govt. body would have adopted for the lack of documentation. If not for your help, most of these children would not have had a chance at cure. The support offered in terms of travel expenses, accommodation expenses, food and nutrition support, clothing and other needs have helped provide quality care to each of these children.

Nutrition Support -

- a) Through this program you have managed to donate various nutrition supplements such as dry fruits,

threptin biscuits, ghee, milk powders etc. These have helped our nutritionists in giving a balanced diet to the children on treatment.

Platelets & Blood -

a) You have helped TMH conduct 4 platelet camps most successfully with corporates and this has added more than 600 platelet donors to our platelet donor registry. Also the unique association with these corporates has helped us reduce our dependency on replacement donors and we have been able to give timely transfusion support to hundreds of children so far. Through the SRCL blood donation camps you have also managed to collect 1200 units of blood.

PSG Meetings Support/ Pediatric events -

a) Parent Support Group Meetings are an integral part of our patient care program. It is most crucial for us to have these informal meetings to address the patients' families. You have managed to help us conduct six PSG meetings till date.

b) Helping us provide entertainment during pediatric birthday celebrations and festivals such as Diwali and Christmas has helped spread joy and happiness to many children.

Donating Instruments-

a) You have managed to donate very important capital equipment such as the Tonometer for pediatrics and the Radical 7 Masimo oximeter for the operating theatre, which would help us serve many patients in a far better manner.

Palliative Care Program

a) You have managed to now extend your service to palliative care by providing for the salary of a home care nursing staff. This would help us in providing better home care to the hundreds of palliative patients.

We are happy to know you have managed to closely support and counsel few pediatric palliative patients at personal levels for their needs towards the end of their lives. Tasmiya and Roshni's families would always be grateful to you and currently your support to Zenith and Anu are really helping them cope with their fears and insecurities.

ACT Clinic-

After completion of therapy clinic is an important part of pediatric care in TMH. Your extending support to help the young survivors of childhood cancer with funds for investigations, medicines and late side effect therapy would benefit almost 100 survivors taking treatment at the hospital.

Support For Annual Report -

Your continuous support in our brochures, patient information sheets, instruction sheets, information charts have helped us to streamline our various programs in pediatrics.

Look forward to your continued support for the same,

Yours sincerely,

Dr. S. D. Banavali
